hi, Charlie:

The 2 tons material has been shipped out of Hong Kong on 8/21. They should arrive in U.S. by Monday your time.

This material is likely the right material, from our Option 1 distributor. Let me know once you get it. Attached please find the shipping info.

Regards,
Michael

hi, Charlie:

I understand your concern.

But everything has been arranged, it involved multiple parties. Nothing is simple when you deal with China's custom/export. I think one bag is faster, but not that much, they will go through same procedure and flight. Just in case we don't cause confusion to other parties, can we stay with the current plan?

Thanks,

Best Regards,
Michael Zhao

Ok

Can you air one bag today separate as it should get here quicker than the whole lot?

thks

hi, Charlie:

The bag you received is from our Option 2 distributor. We decided to source from 2 distributors in parallel to increase our chance, one with higher risk, one with lower risk. The one just arrived at your place is from the higher risk distributor. Based on what I saw here, I was not confident on this material, but you guys decided to get some samples, so we went ahead and bought a bag for you to test out. Seems this is not the material we are looking for. We may not pursue more on this one then.

The 2 tons we are about to pick up today are from Option 1 distributor. The pictures I sent you are from this material, I have high confidence on this material. We are working on locking in another 15 tons of the same material, same lot.

I believe we are on the right path. Please let me know if you have any question or concern.

Ann/Mike/Todd

1. These pictures look great. If these bags are not open, then we have some leverage with Part/Lot# that are on them.

We had been discussing that we had a railroad car situation and that material had been packaged by someone other than Phillips.

2. I need to work with George/Mike so we had a place to put this into HOLD here.

3. How much more can we get if it looks like this??

thks

Charlie

Michael,
If you could try to push a bit on getting the C of A this would be a big help. Is there is anything else he needs to get these?

Could we get a list of the manufacturing lot #'s that are in the 2 tons? Maybe we can get them from another source...

Thanks!

Todd:

These 4000 lbs are locked in, we have paid, they are ours, physically in the distributor's office right now, he just received, I have checked on site.

So I will work with the shipping company tomorrow and arrange to ship all of them out to Charlie ASAP.

Please let me know if you have any question or concern.

Regards,
Michael

We need to lock in all 4000 lbs right away. How do we get payment to insure this is reserved for us? We can decide on how to ship after we get control of it.

We need to work on getting the C of A. Ann, is this something AK plastics may have a path to get for us based upon the lot #'s?

Subject: update on Option 1 distributor

hi, Guys:

I have checked the stock our Option 1 distributor just brought in. It seems the right material. Please see the pictures attached. It was produced in Texas, It is Phillips Sumika, and it's HGX-030-01. He is trying to find CoA, but has not been successful so far.

Our original plan is to get 2 bags first, test them before we get the rest of 2 tons.

But now I feel we have high confidence of this material, please let me know if we should just ship all 2 tons at the same time. I am personally more confident on this material than the one I got from the Option 2 distributor.

We can pick them up at any time, we have 2 tons right here ready.

Regards,
Michael Zhao
