Todd/Mike

Please use this information below to ship in future so material comes through Customs easier... 50 lb. Bag will be delivered to me tomorrow via GMS, they just called me.

Subject: Marlex Resin Being Returned to the U.S.

Hi Charlie,

Have them use the following for a description of the goods being shipped back here to the states:

"Marlex Resin - Being returned to the United States for inter-company use in Marlborough, Massachusetts"

It would be great if they could list the actual manufacturing site (Phillips' complete address in Texas) as well.

Thanks,
Rob

Rob

This is just a bag of Marlex resin as made by Phillips off the shelf. Manufactured in Texas, USA. We couldn't find any through US distributors.

I need this ASAP. We will be flying over another 4,000 lbs in the next day, if not already shipped from Mike.

thks

Hi Charlie,

What exactly is the attached bag of Polypropylene HGX-030-1? Is it just resin, mesh material or tube material? Who made it and where are they located? Is it a component or a finished medical device?

Thanks,
Rob Mullally
